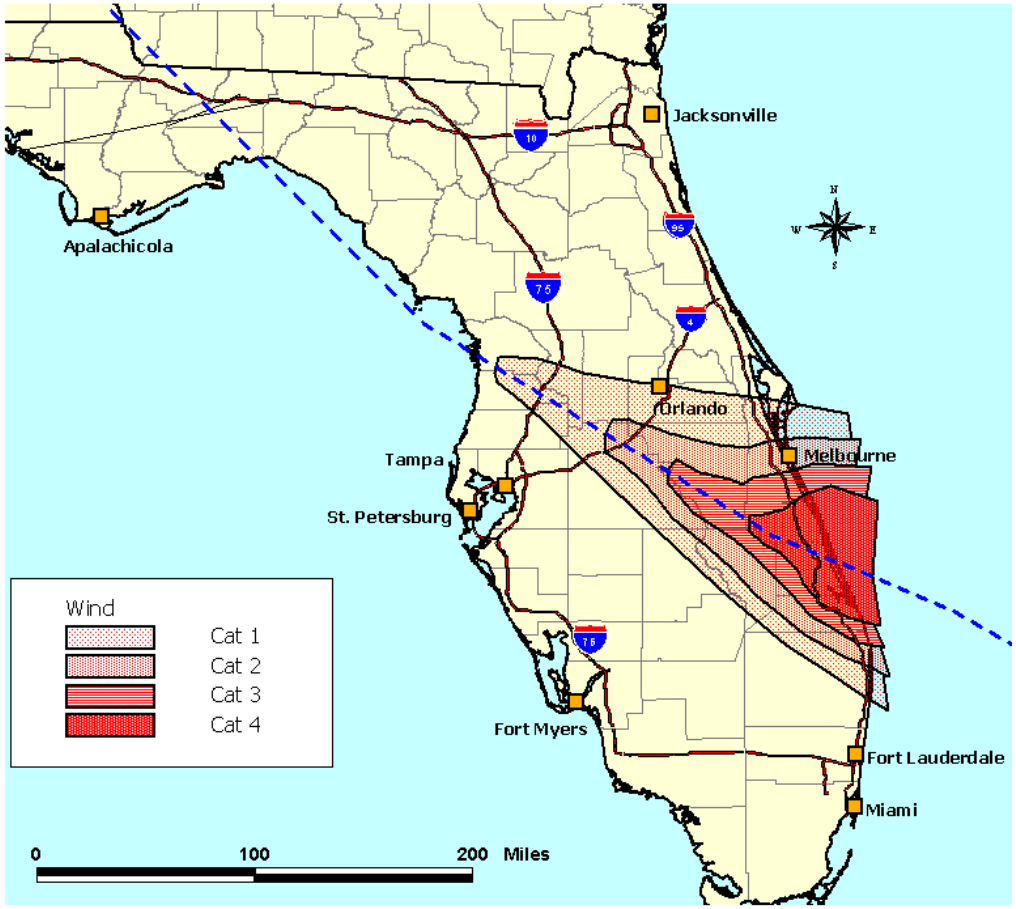
Hurricane Frances Wind Distribution

Landfall Expected Within **36** Hours

For Official Use Only!



Most Probable Landfall Wind Distribution

This hurricane scenario is based on a Category 4 storm making landfall in near proximity to Fort Pierce, FL

Information provided on this page displays the most probable hurricane track based on information from the National Hurricane Center (NHC). These projections are based on information from the NHC ***(0500 EDT 09/03/2004)*** forecast.

Details about this model may be obtained at

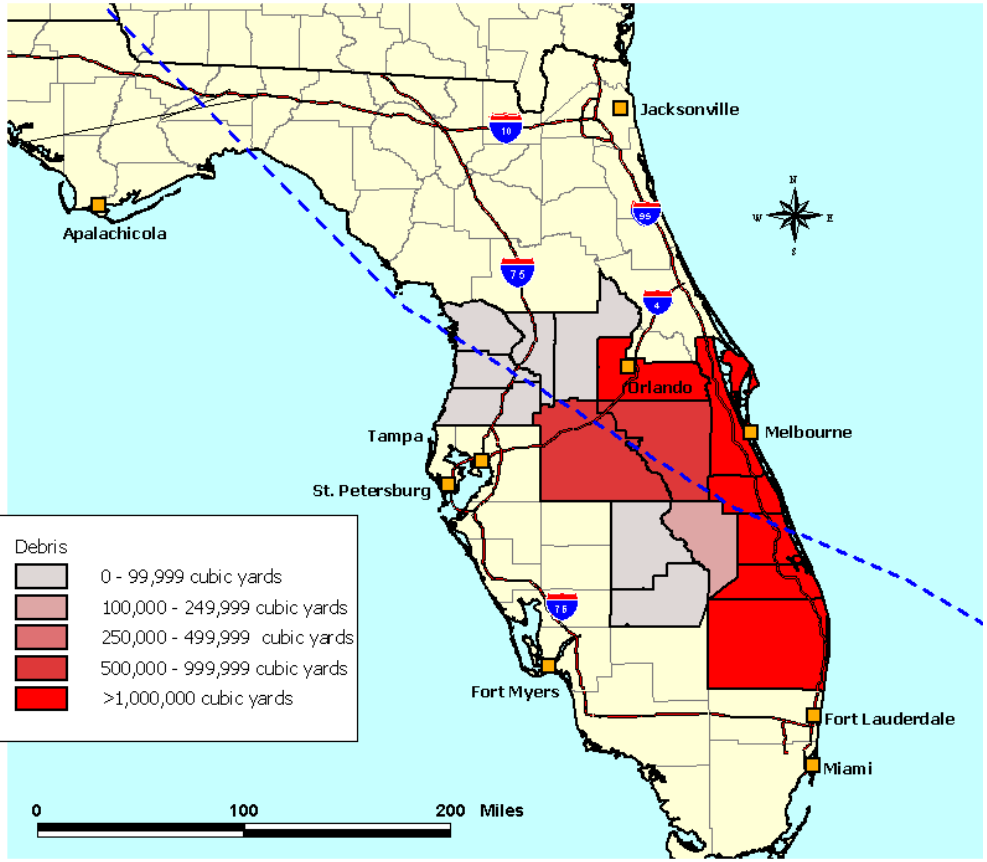
Hurricane Frances Debris Model

Landfall Expected Within **36** Hours

For Official Use Only!



Most Probable Landfall Debris Model Results

Florida – 27,802,000 yd^3

Model results per county on following page

This hurricane scenario is based on a Category 4 storm making landfall in near proximity to Fort Pierce, FL

Information provided on this page displays the most probable hurricane track based on information from the National Hurricane Center (NHC). These projections are based on information from the NHC ***(0500 EDT 09/03/2004)*** forecast.

The amount of debris forecasted is possible total volume, not necessarily the volume that may need to be removed with Federal funds.

Details about this model may be obtained at https://englink.usace.army.mil or contact ENGLink at 1-877-936-4546

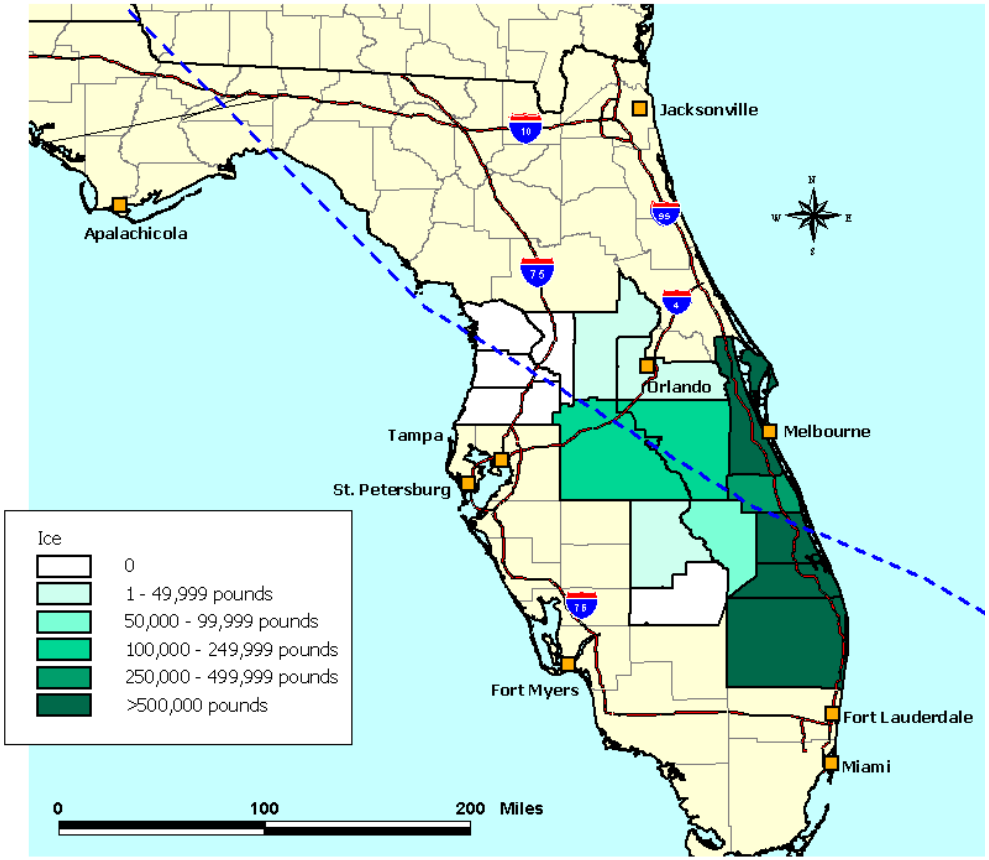
Hurricane Frances Ice Model

Landfall Expected Within **36** Hours

For Official Use Only!



Most Probable Landfall Ice Model Results

Florida – 3,398,000 pounds

Model results per county on following page

This hurricane scenario is based on a Category 4 storm making landfall in near proximity to Fort Pierce, FL

Information provided on this page displays the most probable hurricane track based on information from the National Hurricane Center (NHC). These projections are based on information from the NHC ***(0500 EDT 09/03/2004)*** forecast. The intensity of this hurricane has been altered to complete model runs.

The amount of ice forecasted is based on Mission Guide Book requirements (8 pounds per day per person) and Ice SME input and represents a first day daily need.

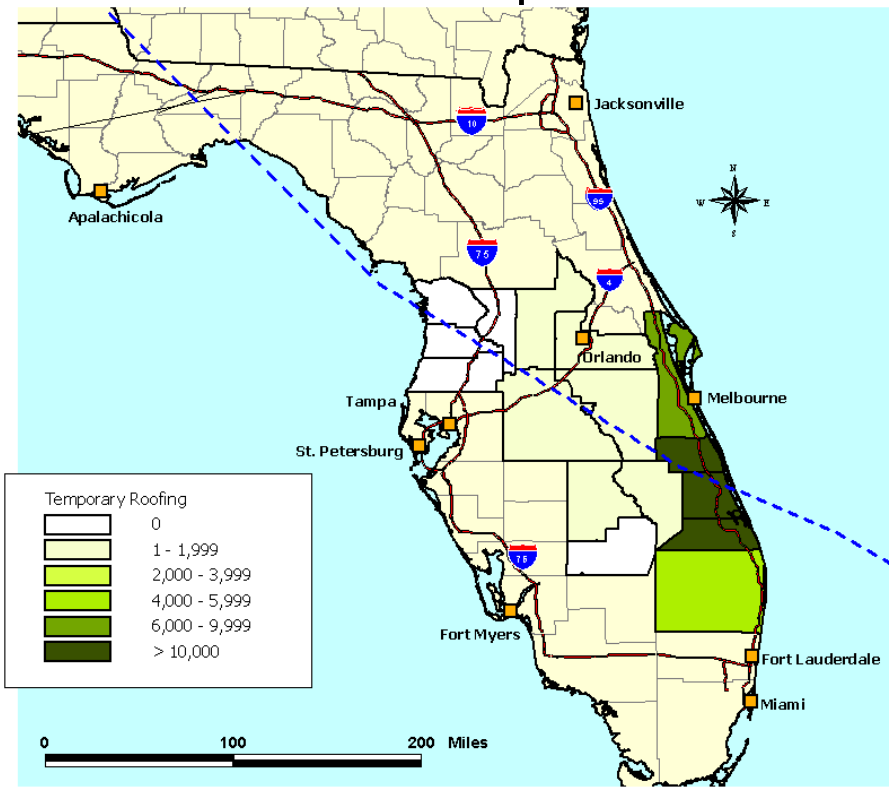
Hurricane Frances
Temporary Roofing Model Results

Landfall Expected Within **36** Hours

For Official Use Only!



Landfall Temporary Roofing Model Results

Florida - 57,200 structures

Model results per county on following page

This hurricane scenario is based on a Category 4 storm making landfall in near proximity to Fort Pierce, FL

Information provided on this page displays the most probable hurricane track based on information from the National Hurricane Center (NHC). These projections are based on information from the NHC ***(0500EDT 9/03/2004)*** forecast.

The amount of temporary roofing that may be required is based on no roofing need in CAT 1 wind areas, 5% of units damaged in CAT 2 areas, 10% of units damaged in CAT 3 areas, and 25% of units in CAT4 areas. This only indicates possible need – not necessarily a mission to repair roofs.

Details about this model may be obtained at **https://englink.usace.army.mil** or contact ENGLink at 1-877-936-4546
